

Measuring and Ordering Casement Sash Components Only "No Glass"

Note: Casement replacement sashes are available with glass. Please see **Wood and Clad Casement Sash With Glass**

What you will need:

Tape measure

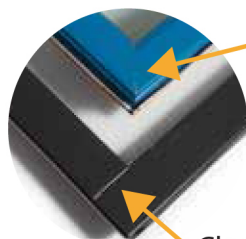

Paper and writing instrument
OR print out this sheet

1.

First. Determine the type of casement window you are replacing.

Wood

Clad w/ Miter Joint

NOTE: If the corner is a miter cut please contact us for availability. A sash kit with a miter joint **CAN NOT** be ordered on line.

Clad w/ Butt Joint

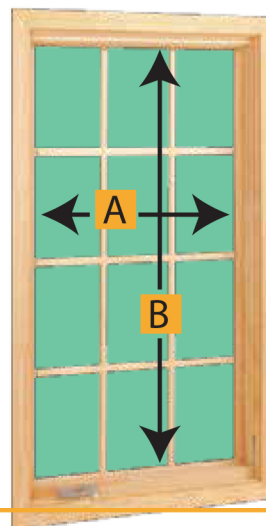

2.

Second. Measuring the window.

Measure the daylight opening of the window, this is the opening that would be cleaned when you are cleaning the glass.

Do not measure the outside of the window, only the opening that receives daylight. This area is highlighted in green in the illustration.

Daylight opening shown in green

A= Width
B= Height

3.

Third. Provide us the info!
